The garden evidence sheet

The Refuge · Chapter 40

Use a sketch or photograph to show another gardener exactly which plant and which part you looked at.

Bed or location

Plant or variety

Observation date

Observer

Where on the plant	What I actually saw	What I still need to check
Lower leaf, underside	Two holes near the edge	What made them?

Sketch both sides of the leaf or write the names of the two photos you took.

A question belongs on the record even when you cannot name the cause.
